
I have to admit I prefer CorelDraw. Just kidding. CorelDraw is pretty awful. Here's the link to the download for SolidWorks 2014, with a crack that will get you through activation: <http://solidworks2014downloads.blogspot.com/2015/01/solidworks-2014-download-with-crack-64121.html> Here's the link for CorelDraw X3, with a serial number generator so that you can register your copy of the software: <http://www.coreldraw.com/en-us/product/corel-drawings/x3-windows> I've tried both programs and enjoy just about all of CorelDraw's features. As far as I know, there isn't any feature overlap which would make the buy of one over another difficult. The only thing I can think of would be price, but if you are on a tight budget it is possible to get both for cheaper than buying either one individually. Just a couple of things I've found that weren't mentioned in the other reviews.

I just wanted to put these two articles together so that those who are searching for either software could have a combined location from where to download and/or buy each one. These articles aren't meant as a comparison, but rather as a place for those searching as well as those who have already made their choice as to which program to use.

I'll consider writing reviews for any or all programs if there is significant interest. I am extremely familiar with CorelDraw, but otherwise really know nothing about SolidWorks. I'm kind of a software junkie though and I've purchased and purchased numerous versions of CorelDraw for my needs. If you find these articles useful, please consider either subscribing to my blog or voting for it on Technorati. And as always, if you have any comments, questions or suggestions please just let me know.
